

TONY VELASCO

WEB DEVELOPER

512-415-8194 | tony@excavata.com | [in](#) | [Q](#) |

EDUCATION

UT Austin Coding Bootcamp, Full Stack Development Certification, Graduated January 2019

UT Austin, BS in Advertising, Emphasis on Computer Science and Advanced Math

TECHNICAL SKILLS

HTML | CSS | JavaScript | NodeJS | Express | MongoDB | Python | mySQL | Sequelize | Github | Heroku | REST APIs | React |

TECHNICAL EXAMPLES OF SKILLS

TEAM STEAMBOAT CRM DATABASE

- Created a mobile front-end using Passport authorization for reservations and check-in for a client's annual music festival / ski trip with over 4000 guests.
- Designed UI using Bootstrap and served as Project Manager. This online reservation tool vastly improves upon client's existing solution which used outdated technology and local, read-only data onsite. Secure online access keeps various check-in locations up-to-date in real-time.

SPOTIFY TOUR STATION

- Developed a data-driven tool for planning a professional musician's tour agenda.
- Used API from Spotify, FourSquare and Google Trends to allow the user to search markets where a band is most popular, find potential venues in each market and locate their top 10 tracks on Spotify.

TEXAS DANCE HALL TOUR - WEB DEVELOPER

- Developed website for Ray Benson and Asleep at the Wheel's annual Dance Hall Preservation Tour.
- Used JavaScript, CSS, HTML and Wordpress.

Built a mobile-ready website for reservations to an annual tour benefitting the Texas Dance Hall Preservation Project.

WEB DEVELOPER SUMMARY

- Write, design, and edit Web page content and direct others producing content
- Evaluate code to ensure that it is valid, is properly structured, meets industry standards, and is compatible with browsers, devices and operating systems
- Perform validation testing according to planned schedules in coordination with any Web site or product revision
- Familiarity with administering CMS platforms including WordPress
- Familiarity with web standards, responsive design, progressive enhancement, accessibility and current best practices
- Demonstrated experience developing websites in a professional context
- A basic understanding and appreciation of the fundamentals of good user-experience design including an eye for good visual and information design
- Knowledge of online video and digital media and ability to work on diverse projects simultaneously

DATABASE MANAGEMENT SUMMARY

- Test programs or databases, correct errors, and make necessary modifications
- Plan, coordinate and implement security measures to safeguard information in computer files against accidental or unauthorized damage, modification or disclosure
- Modify existing databases and database management systems and coordinate updates with project team
- Specify users and user access levels for each segment of database
- Write and code logical and physical database descriptions and specify identifiers of database to management system or direct others in coding descriptions
